

## Enhanced Outreach to Begin

In February, 2005 One Vision One Life Community Coordinators will begin enhanced outreach efforts in targeted neighborhoods.

Community Coordinators will distribute public education materials, launch a public response to every shooting, and begin “managing a caseload” of community partners and at-risk kids.

One Vision One Life leaders, especially Director Richard Garland and Reverend Glenn Grayson, community partner and fiscal agent, agree that it’s time for One Vision One Life to be more visible in the target communities.

Enhanced outreach efforts will augment the behind-the-scenes work that already goes on to prevent violence and retaliations.

Before enhanced outreach begins, intensive training will take place on topics such as outreach protocol, distributing public education materials, and handling a caseload.
